

## **Scan with the Experts:**

*Gynecological Scanning Skills Workshop*

*Cardiovascular Workshop*

*Emergency Medicine Scanning Skills Workshop*

*Critical Care Ultrasound*

*Internal Medicine Scanning Skills Workshop*

*OB Scanning Skills Workshop*

*Abdomen Scanning Skills Workshop*

Customized ultrasound training courses are our specialty. Ultrasound scanning skills workshops provide participants ample hands on scanning opportunities on live models under the direction of expert ultrasound faculty. The focus of the training is to provide a supervised scanning experience to increase your clinical proficiency and confidence through repetitious scanning using established industry standard protocols. At the conclusion of the workshop each participant will be provided a procedure log to supplement the documentation needed for hospital credentialing, certification requirements and accreditation/reaccreditation efforts.

**Prerequisite:** Introductory ultrasound experience is required to enroll in a scanning skills workshop.

**Target Audience:** Physicians, sonographers, and other medical professionals who have a desire to obtain additional hands on ultrasound scanning experience.
